Enclosed is your copy of Rand Research Memorandum RM-411, "Political Trends in Japan."

This memorandum presents a brief analysis of Japanese attitudes toward the Occupation authorities and American Far Eastern policy, with particular reference to the effects on political developments in Japan of recent changes in the tactics of the Japanese Communist Party.

This analysis is a by-product of broader Rand studies dealing with the military and policy implications of social and political developments abroad. Although it is primarily an internal working paper we hope that it will be of interest to you at this time.

Very truly yours,

/s/ Victor Hunt
